

# Free RV Campsite Fit Checklist

## 1. Know Your RV Dimensions

- Overall length (tow vehicle + trailer if applicable)
- Width with slides extended
- Full height including A/C, antennas, or accessories

## 2. Campsite Pad Requirements

- Minimum pad length needed
- Slide-out clearance on both sides
- Surface type (concrete, gravel, dirt)
- Space for tow vehicle parking

## 3. Hookups & Utilities

- Power: 30A / 50A availability
- Water hookup location vs RV inlet
- Sewer connection distance & angle
- Space to reach hookups without strain

## 4. Access & Navigation

- Road width and turning radius suitable
- Low branches or low-clearance obstacles
- Tight corners or narrow campground loops
- Ability to approach site straight or angled

## 5. Campsite Surroundings

- Proximity to trees, posts, or picnic tables
- Fire ring placement vs slide-outs
- Shade or sun exposure as preferred

## 6. Noise & Location Factors

- Distance from entrance, bathhouse, dumpsters
- Traffic or generator noise potential
- Privacy level and spacing between sites

## 7. Final Fit Check

- Enough room to open awning
- Leveling space available
- Safe path for hoses and cords
- Emergency exit routes clear

*Print this checklist or save it on your phone so you can confirm fit before every reservation.*
